Fandy Ahmad Januar Pratama

Frontend Developer
Kuta Selatan, Bali • fandyglitch3@gmail.com • +62 87759205806

ABOUT ME

I am a frontend developer who enjoys turning ideas and requirements into clean, practical, and user-friendly digital experiences. I enjoy learning new technologies, solving problems, and finding efficient ways to improve how I work. I am comfortable working independently, taking ownership of tasks, and collaborating with others to deliver projects. I also actively use AI tools to support research, problem-solving, development, and productivity.

CORE SKILLS

Frontend: React • Next.js • TypeScript • Tailwind CSS • shadcn/ui
Backend & Integration: Node.js • REST API • Webhooks
Data & State: MongoDB • Firebase • TanStack Query • React Hook Form • Zustand
Tools & Environment: Git • Docker • Vercel • Linux • VS Code • OpenCode • Cline
AI: AI Prompting • AI-assisted Development • AI-assisted Research & Analysis
Domain: Investment Platforms • Investor Portals • Admin Portals • Portfolio Tracking • Financial Reporting

EXPERIENCE

Frontend & Backend Developer — PT. Miravelle Sunzaryn
2022 – 2026

• Built and maintained web applications for property, investment, and business operations.
• Developed interfaces for investor portals and admin dashboards, including investment opportunities, portfolio tracking, financial reporting, and investor communications.
• Connected frontend applications with APIs, databases, and backend services using Firebase and MongoDB.
• Translated business requirements into practical and responsive user interfaces.
• Managed development tasks independently across multiple projects, from implementation to delivery.
• Prepared technical notes and implementation documentation to support development and handover.

Frontend Developer (Internship Program) — PT Bina Taruna Wiratama
2024 – 2025

• Turned Figma designs into responsive and reusable dashboard interfaces.
• Contributed to **Menulis AI**, an AI-powered platform for teachers to create and generate questions using AI.
• Integrated frontend applications with APIs and managed application data and state.
• Worked with the development team to improve interface quality and deliver features based on product requirements.

Frontend Developer — PT Semua Aplikasi Indonesia
2021 – 2022

• Developed responsive web and mobile interfaces for business applications.
• Built frontend features using Next.js, React Native, and Tailwind CSS.
• Worked on translating product requirements into functional and user-friendly interfaces.
• Collaborated with the team to implement, test, and improve application features.

SD 4 Benoa — 2009 – 2015

WORK STYLE

Independent, curious, and adaptable. I enjoy taking ownership of tasks, learning through hands-on work, and finding practical solutions to technical problems. I am comfortable working independently or with a team, and I use AI tools thoughtfully to improve research, development, documentation, and productivity.
